

# Berenty Lodge

Berenty lodge is set in the heart of the Berenty Private Nature Reserve and allows the ideal possibility for exploring the reserve which boasts one of the best opportunities to observe lemurs up-close. The lodge also has a pleasant tea garden where afternoons can be spent watching the mischievous ring tailed lemurs or dancing sifakas at play; alternatively one can visit the museum. The main facilities at the lodge include a bar and restaurant which serves traditional

Malagasy style food incorporating seafood and the catch of the day.

Berenty lodge has twelve environmentally orientated bungalows. Each of the bungalows has an en suite bathroom with a toilet and shower and is air conditioned, which is a relief as the lodge can get very humid due to its location in the nature reserve.

The main activities from the lodge are focused around Berenty private Reserve and all it has to offer. From walking in the dense forest - a fascinating experience - that allows the opportunity of seeing snakes (no poisonous species), parrots, eagles and other birds in lush vegetation that remains Virgin forest. There is also the option of visiting a local art museum, which displays the local artifacts and history of the region, and a sisal factory.
