

Chelinda Lodge

Chelinda Lodge is currently being refurbished and is scheduled for completion before July 2010. Bookings for Chelinda Lodge will be taken from September 2009. Chelinda Lodge is constructed against a pocket of hagenia woodland and overlooking vast tracts of Nyika National Park's rolling grasslands dotted with large herd of roan, eland and zebra. This forest backdrop to Chelinda Lodge provides perfect shelter for an idyllic escape in the highland wilderness of Malawi.

Accommodation at Chelinda Lodge consists of eight log cabins, each with fireplace for those icy highland nights. Chelinda Lodge Cabins are double storey. The ground floor features an open plan bedroom and lounge, with en-suite bathroom, queen-sized beds, wing-back chairs and a veranda. Upstairs there is a viewing area which functions as additional living space and is ideal for children. One of the log cabins is slightly larger, offering ideal accommodation to families.

All the cabins are connected by wooden walkways which are beautifully landscaped on the hillside around Chelinda Lodge. The main building has a convivial dining area around the fireplace, a quiet lounge which opens onto an outside deck for sundowners. Activities at Chelinda Lodge revolve around day and night nature drives which explore the rolling hills and patches of evergreen forest of the Nyika Plateau. Nature walks and mountain biking are also very

popular. For the enthusiast, there is also the option of fly-fishing for trout in the network of lakes close to the lodge.
